

Website Oral Presentation
April 16, 18, 20

Please respond to the following questions/issues during your presentation:

- What was your thinking process when you found out a website was required for this course? What were you most afraid of, for example?
- How did you prepare for this project? What did you need to organize or collect before getting started (or did you just start designing a page on a whim)?
- What were the most difficult challenges for you (For example, what caused you the most problems—buttons, templates, tables, pictures, etc.)? How did you tackle those problems?
- What did you learn about webpages/design that you did not know before?
- What would have made this project less difficult for you?

Outline:

This presentation is 5-7 minutes (must be at least 5 minutes).

- Before you begin your presentation please display your site on the LCD Screen.
 - At some point during your presentation please show each page of your site so that we can see how the navigation works. You might also use your page/s as a way to respond to the above questions.
 - Please describe what is included on each page and explain why you decided to include it (besides the fact that it was required for the assignment)
-

This presentation is meant to be informal but please respond to the questions/issues above and be sure to follow the procedure above.

Student _____

Criteria	Yes	No	Comments
Student displayed website and all pages were in working order			
Student was prepared for the presentation			
Student described what they learned about webpage/s that they did not know before			
Student described the most difficult challenges			
Student described what could have made the project less difficult for them
