

## Materials List

It is best to maintain an extensive inventory of supplies for Advanced Painting.

The following is a recommended list of materials including the most commonly used. Right away, you should inventory your pigments, brushes, support preparation equipment, and supplement these with new paints, different brushes, and new support materials. Remember that pigments differ in qualities of opacity and transparency; you should make sure your palette contains a variety of paints. Check with me if you have questions about the condition of your brushes, pigments, or support supplies.

Acrylics; due to space and safety issues **acrylics are the medium of choice this semester**

painting board—plywood, Masonite, or Plexiglas—22 x 30" minimum size

1 qt White Flat latex paint—gesso substitute; or buy Artist-grade gesso
