The Best of 2004

The latest and greatest educational products for teachers and kids

We invited dozens of teachers to Scholastic this summer to help us review new classroom-ready materials just for you!

We received hundreds of wonderful resources from education companies all around the country — from curriculum-based books and software titles to games and manipulatives. Our team of teacher-reviewers rolled up their sleeves and pored over these offerings. They played with learning games, manipulatives, and building sets. They got super-creative with art supplies. They shared notes and swapped innovative uses for products. Then they told us exactly what they thought! Here, we present their favorites. We hope you find some great items to enrich your teaching!

Check out their top picks in:
