Index

n-th order differential equation, 2
1-parameter family of solutions, 3

adjoint operator, 203
amplitude, 19
angular frequency, 19
associated Legendre functions, 229
autonomous, 39, 96
autonomous equation, 3

Bernoulli equation, 27, 94
Bernoulli, Daniel, 27, 162, 233
Bernoulli, Jacob, 27
Bernoulli, Jacob II, 27
Bernoulli, Johann, 27
Bernoulli, Johann II, 27
Bernoulli, Johann III, 27
Bernoulli, Nicolaus I, 27
Bernoulli, Nicolaus II, 27
Bessel functions, 233
  first kind, 234
  Fourier-Bessel series, 236
  generating function, 236
  identities, 235
  orthogonality, 235
  recursion formula, 235
  second kind, 234
Bessel, Friedrich Wilhelm, 233
bifurcation, 97
bifurcation point, 98
boundary conditions, 146, 198
boundary value problem, nonhomogeneous , 153
boundary value problems, 145

capacitor, 21
carrying capacity, 92
Cauchy, Augustin-Louis, 230
Cauchy-Euler Equations, 13
  nonhomogeneous, 14
center, 46
characteristic equation, 7, 63
  Cauchy-Euler Equation, 13
chemical kinetics, 57
Clairaut equation, 28
Clairaut, Alexis Claude, 28
classical orthogonal polynomials, 217, 220
coefficient matrix, 61
Constant Coefficient Equations, 7
cosine series, 179
coupled systems, 39
Cramer's rule, 42
current, 21

d'Alembert, Jean le Rond, 161
damped harmonic motion, 47
de Beaune, Florimond , 25
de Moivre, Abraham, 232
diagonalization, 79
differential equations
  series, 228, 233
differential operator, 6, 151
Dirac Delta Function, 264
  sifting property, 266
direction field, 44
Dirichlet boundary conditions, 198
Dirichlet, Gustav Lejeune, 198
distribution, 264
double factorial, 225
double tank problem, 56
Duffing equation, 124
Duffing, Georg, 124

eigenfunction expansion, 209, 273
eigenfunctions, 152
  complete, 201
  orthogonal, 201
eigenvalue, 63
eigenvalue problem, 63, 153, 273
eigenvalues, 152
  real, 200
eigenvector, 63
Einstein, Albert, 37

elliptic functions, 134
elliptic integral, 130, 131
  complete, 132
  incomplete, 132, 133
epidemic model, 59
equilibrium, 41
  center, 46
  degenerate node, 47
  focus, 46
  node, 45
  saddle, 45
  source, 45
equilibrium solution, 93, 96
Euelr, Leonhard, 161
Euler, Leonhard, 27, 131, 233
explicit solution, 3
exponential of a matrix, 61, 78

Fagnano, Giulio Carlo, 131
first order differential equation, 2
fixed point, 93, 96
forced harmonic oscillator, 9, 257
Fourier coefficients, 166
  generalized, 210
Fourier series, 161, 165
Fourier, Joseph, 161, 230, 233
Fourier-Bessel series, 233
Fourier-Legendre series, 220, 229
Fredholm alternative, 211
frequency, 19, 163
function
  periodic, 163
  sigmoid, 96
  sinusoidal, 164
fundamental matrix, 71
fundamental matrix solution, 72

Gamma function, 231
Gauss, Carl Freidrich, 231
Gauss, Carl Friedrich, 217
Gauss, Karl Freidrich, 232
Gegenbauer polynomials, 220
generalized Fourier expansion, 272
generalized function, 264
George Pólya, 1
Gibb phenomenon, 184
GNU Octave, 190
Gram-Schmidt Orthogonalization, 218
gravitational potential, 224
Gree's function, 249
Green's function
  boundary value, 255, 258
  differential equation, 268
  initial value, 255
  properties, 261
  reciprocity, 261
  series representation, 271
Green's identity, 205

heat equation, 147
Heaviside function, 230, 264
Heaviside, Oliver, 230
Heine, Heinrich, 222
Hermite polynomials, 220
Hermitian, 204
Hermitian operator, 205
heteroclinic orbits, 111
homogeneous, 40
homogeneous equation, 2
Hooke's Law, 19, 37
Huygens, Christiaan, 25

implicit solution, 3
impulse, 271
inductor, 21
initial value problem, 2
inner product, 157
integrating factor, 3, 199
inverse tangent problems, 25
Ivory, James, 222

Jacobi polynomials, 220
Jacobi, Carl Gustav, 222
Jacobian matrix, 102
jump condition, 271

Kepler, Johannes, 233
Kewpler, Johannes, 161
Kirchoff's rules, 21
  Loop rule, 54
  Point rule, 54

Lagrange equation, 28
Lagrange's identity, 205
Lagrange, Joseph Louis, 28
Lagrange, Joseph-Louis, 233
Laguerre polynomials, 220
Laplace equation, 147
Laplace, Pierre-Simon, 197, 224
Laplacian operator, 147
Legendre polynomials, 220, 221
  generating function, 224
  leading coefficient, 237
  normalization, 228
  recurrence relation, 222
  recursion formula, 222
  Rodrigues formula, 222

Legendre, Adrien-Marie, 220, 224, 231
line of equilibria, 48
linear nth order differential equation, 2
linear algebra, 151
linear first order differential equation, 3
linear operator, 6
linearization, 96, 102
linearly independent, 7, 155
logistic equation, 92
  solution, 95
Lotka, Alfred James, 113
Lotka-Volterra model, 113
  first integral, 116
LRC circuits, 20, 54

Maclaurin series, 61
Malthus, Thomas Robert, 92
mass-spring system, 19
  coupled, 38
MATLAB, 190
matrix
  Hermitian, 79
  orthognal, 79
  self-adjoint, 79
  symmetric, 79
  unitary, 79
matrix formulation, 60
mechanical energy, 130
Mersenne, Marin, 25
Method of Reduction of Order, 8
Method of Separation of Variables, 148
Method of Undetermined Coefficients, 9
  Modified, 12
Method of Variation of Parameters, 250
mixture problems, 55

Neumann boundary conditions, 198
Neumann function, 234
Neumann, Carl, 198
Newton's Second Law, 37
Newton's second law, 19
nonautonomous, 39
  nonlinear systems, 123
nonhomogeneous equation, 2, 146, 250
nonhomogeneous solutions, 75
nonlinear pendulum
  forced, 123
  period, 129
normalization, 219, 227, 273

Octave, 190
orbit, 43
orthogonal matrix, 79
orthogonality, 169
  eigenfunctions, 201
orthonormal, 169
orthonormal basis, 156
oscillations
  coupled, 37
overdamped, 47

partial differential equations, 147
particular solution, 3
pendulum, 19
  forced nonlinear, 123
  nonlinear, 101
  period, 129
pendulum, simple, 20
period, 19, 163
periodic boundary conditions, 198
periodic extensions, 183
Perrault, Claude, 25
phase portrait, 43
pitchfork bifurcation, 100
Poincaré surface of section, 125
Poincaré, Jules Henri, 91
Poisson equation, 147
Poisson, Siméon, 233
polar coordinates, 49
  derivatives, 50
population models, 92
  logistic, 92
  Lotka-Volterra, 113
  Malthusian, 92
potential drops, 21
potential energy, 130
predator-prey model, 58
principal matrix solution, 74
proct solutions, 150
pursuit curves, 22
Putzer Algorithm, 83
Python, 192

quadrature, 130

Rayleigh quotient, 207
Rayleigh, Lord, 201
real eigenvalues, 200
real symmetric, 204
relative error, 129
resistor, 21
Riccati equation, 31, 94
Riccati, Jacopo, 249
Riccati, Jacopo Francesco, 31, 94
Riemann, Bernhard, 230, 249
Robin boundary conditions, 198
Romeo and Juliet, 59
Rota, Gian-Carlo, 145

saddle point, 45
saddle-node bifurcation, 99
salsa problem, 89
scalar product, 156
Schrödinger Equation, 147
Schwinger, Julian, 249
second order linear differential equation, 6
self-adjoint form, 252
self-adjoint operator, 205
separable equation, 2
separatrix, 111
series representation, 271
sigmoid function, 96
similarity transformation, 80
simple harmonic motion, 9, 19, 38, 47
sine series, 179
singular solutions, 30
sinusoidal functions, 162
slope field, 43
small angle approximation, 20
solutions
  equilibrium, 41
spiral, 46, 49
stability criteria, 97
step function, 264
Stone-Weierstraß Theorem, 217
Strutt, John William, 201
Sturm-Liouville, 250
Sturm-Liouville operator, 198
Sturm-Liouville problem, 236
  regular, 198
  singular, 198
surfaces of section, 125
systems
  constant coefficient, 40
