

RUSSELL L. HERMAN

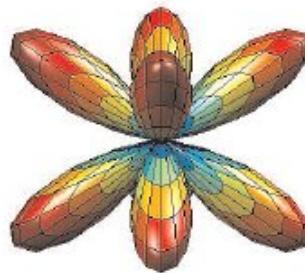

A FIRST COURSE IN  
PARTIAL DIFFERENTIAL EQUATIONS

$$\int_V (\varphi \nabla^2 \chi - \chi \nabla^2 \varphi) dV = \oint_S (\varphi \nabla \chi - \chi \nabla \varphi) \cdot \hat{n} dS$$

$$u_t = k \nabla^2 u$$

$$T(r, z, t) = T_b + \frac{8(T_i - T_b)}{\pi} \sum_{n=1}^{\infty} \sum_{m=1}^{\infty} \frac{\sin \frac{(2n-1)\pi z}{Z}}{(2n-1)} \frac{J_0(\frac{r}{a} j_{0m}) e^{-\lambda_{nm} kt}}{j_{0m} J_1(j_{0m})}$$

# *Contents*

<b>Prologue</b>	<b>vii</b>
Introduction . . . . .	vii
Acknowledgments . . . . .	viii
<b>1 Second Order Partial Differential Equations</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Boundary Value Problems . . . . .	4
1.3 Derivation of Generic 1D Equations . . . . .	7
1.3.1 Derivation of Wave Equation for String . . . . .	7
1.3.2 Derivation of 1D Heat Equation . . . . .	9
1.4 Separation of Variables . . . . .	10
1.4.1 The 1D Heat Equation . . . . .	10
1.4.2 The 1D Wave Equation . . . . .	14
1.5 d'Alembert's Solution of the Wave Equation . . . . .	16
1.6 Classification of Second Order PDEs . . . . .	27
1.7 The Nonhomogeneous Heat Equation . . . . .	33
1.7.1 Nonhomogeneous Time Independent Boundary Conditions . . . . .	33
1.7.2 Time Dependent Boundary Conditions . . . . .	37
1.7.3 Duhamel's Principle . . . . .	39
1.8 Laplace's Equation in 2D . . . . .	40
Problems . . . . .	43
<b>2 Trigonometric Fourier Series</b>	<b>47</b>
2.1 Introduction to Fourier Series . . . . .	47
2.2 Fourier Trigonometric Series . . . . .	50
2.3 Fourier Series Over Other Intervals . . . . .	56
2.3.1 Fourier Series on $[a, b]$ . . . . .	62
2.4 Sine and Cosine Series . . . . .	64
2.5 Solution of the Heat Equation . . . . .	69
2.6 Finite Length Strings . . . . .	72
2.7 The Gibbs Phenomenon . . . . .	74
Problems . . . . .	79
<b>3 Numerical Solutions of PDEs</b>	<b>83</b>
3.1 The Finite Difference Method . . . . .	83

3.2	Truncation Error . . . . .	89
3.3	Stability . . . . .	91
<b>4</b>	<b>Sturm-Liouville Boundary Value Problems</b>	<b>95</b>
4.1	Sturm-Liouville Operators . . . . .	95
4.2	Properties of Sturm-Liouville Eigenvalue Problems . . . . .	99
4.2.1	Adjoint Operators . . . . .	102
4.2.2	Lagrange's and Green's Identities . . . . .	104
4.2.3	Orthogonality and Reality . . . . .	104
4.2.4	The Rayleigh Quotient . . . . .	106
4.3	The Eigenfunction Expansion Method . . . . .	107
4.4	Appendix: The Fredholm Alternative Theorem . . . . .	110
Problems . . . . .		112
<b>5</b>	<b>Non-sinusoidal Harmonics and Special Functions</b>	<b>115</b>
5.1	Function Spaces . . . . .	116
5.2	Classical Orthogonal Polynomials . . . . .	119
5.3	Fourier-Legendre Series . . . . .	122
5.3.1	Properties of Legendre Polynomials . . . . .	123
5.3.2	Generating Functions The Generating Function for Legendre Polynomials . . . . .	126
5.3.3	The Differential Equation for Legendre Polynomials .	130
5.3.4	Fourier-Legendre Series . . . . .	131
5.4	Gamma Function . . . . .	133
5.5	Fourier-Bessel Series . . . . .	135
5.6	Appendix: The Least Squares Approximation . . . . .	139
Problems . . . . .		142
<b>6</b>	<b>Problems in Higher Dimensions</b>	<b>149</b>
6.1	Vibrations of Rectangular Membranes . . . . .	151
6.2	Vibrations of a Kettle Drum . . . . .	156
6.3	Laplace's Equation in 2D . . . . .	165
6.3.1	Poisson Integral Formula . . . . .	173
6.4	Three Dimensional Cake Baking . . . . .	175
6.5	Laplace's Equation and Spherical Symmetry . . . . .	182
6.5.1	Spherical Harmonics . . . . .	188
6.6	Spherically Symmetric Vibrations . . . . .	190
6.7	Baking a Spherical Turkey . . . . .	192
6.8	Schrödinger Equation in Spherical Coordinates . . . . .	196
6.9	Curvilinear Coordinates . . . . .	203
Problems . . . . .		211
<b>7</b>	<b>First Order Partial Differential Equations</b>	<b>215</b>
7.1	Introduction . . . . .	215
7.2	Linear Constant Coefficient Equations . . . . .	217
7.3	Quasilinear Equations: The Method of Characteristics . . . . .	219
7.3.1	Geometric Interpretation . . . . .	219

7.3.2	Characteristics . . . . .	220
7.4	Applications . . . . .	224
7.4.1	Conservation Laws . . . . .	224
7.4.2	Nonlinear Advection Equations . . . . .	226
7.4.3	The Breaking Time . . . . .	228
7.4.4	Shock Waves . . . . .	230
7.4.5	Rarefaction Waves . . . . .	232
7.4.6	Traffic Flow . . . . .	238
7.5	General First Order PDEs . . . . .	240
7.6	Modern Nonlinear PDEs . . . . .	243
	Problems . . . . .	243
	<b>Index</b>	<b>247</b>

*Dedicated to those students who have endured  
previous versions of my notes.*
