

Spring 2016 MAT161- 003

Calculus with Analytical Geometry I

OS 2004

2:00 PM – 3:05 PM Monday - Thursday

Instructor: Dr. Xin Lu

Webpage: <http://people.uncw.edu/lux/>

Email: lux@uncw.edu

Phone: 910-962-3673

Office: OS1007C

Office Hours: M-Th-11:00AM-12:00PM or by appointment

Calculus, Early Transcendental

by James Stewart 8th Edition

Topics(chapters) covered:

1. Functions and Models
2. Limits and Derivatives
3. Differentiation Rules
4. Applications of Differentiation
5. Integrals
6. Applications of Integration

Text Book and Required Material

- WebAssign

Option 1: At the UNCW bookstore, the text is bundled with a WebAssign access code. You will need this access code if you choose to use this product.

Option 2: If you buy the text alone, an access code can be purchased on-line at www.webassign.com.

Option 3: You can purchase online just WebAssign for Stewart and use the ebook alone without a printed text.

Class Key for registration WebAssign online:
uncw 9611 4785

The advantages of WebAssign include an ebook version of the text with a robust online homework and tutorial system.

Note: WebAssign will be a useful tool to assist you in this course. It will be used for homework but not in tests and final exam

- Graphing Calculator (TI 83 or 84)

Spring 2016 MAT161- 003

Calculus with Analytical Geometry I

OS 2004

2:00 PM – 3:05 PM Monday - Thursday

Course Catalog Description: MAT 161-162. Calculus with Analytic Geometry (4-4)

Prerequisite: MAT 112 or 115 or equivalent preparation in algebra and trigonometry. Calculus of a single variable intended for students in the mathematical and natural sciences. Functions and limits; differentiation with applications including maxima and minima, related rates, approximations; theory of integration with applications; transcendental functions; infinite sequences and series; conic sections, parametrized curves and polar coordinates; elementary differential equations. Three lecture and two-hour laboratory hours each week.

Goal of the Course: MAT 161 is the initial half of the standard university single variable calculus sequence. Its principal goal is to show how calculus has served as the primary quantitative language of science and engineering for the last three centuries. It provides the theoretical basis used to model change. Students in this course will develop the mathematical skills found in the core topics of limits, derivatives and integration, rigor and estimation. Students will investigate the wider application of these skills in the natural and social sciences and communicate the results of these investigations.

Course Student Learning Objectives: Upon completing MAT 161, students should be able to:

- Use graphical, numerical, analytical and verbal representations of functions, limits, derivatives and integrals. (MS 1; QRE 1)
- understand the meaning of the derivative in terms of a rate of change and local linear approximation and use derivatives to solve a variety of problems. (MS 1 & 2; QRE 1 & 2)
- understand the meaning of the definite integral both as a limit of Riemann sums and as the net accumulation of change and use integrals to solve a variety of problems. (MS 1 & 2; QRE 1 & 2)
- understand the relationship between the derivative and the definite integral as expressed in the Fundamental Theorem of Calculus. (MS 1; QRE 1) use correct mathematical syntax to explain solutions in both written and graphic forms. (MS 3; QRE 3)
- model physical situations using the concepts of calculus. (MS 2 & 3; QRE 2 & 3)
- use technology to help solve problems, experiment, interpret results, and verify and communicate conclusions. (MS 1 & 2 & 3; QRE 1 & 2)
- determine the reasonableness of solutions, including sign, size, relative accuracy, and units of measurement. (MS 2 & 3; QRE 1, 2 & 3)

Required Technology in MAT 161: MAPLE is the principal mathematical software used in MAT 161. The departmentally approved and required minimal expectations for computer use in MAT 161 are: graphing and graphical analysis, Newton's Method, Riemann Sums, and linear and quadratic approximations. Technology may clearly be used for additional purposes, including evaluation of definite integrals arising in applications. The text identifies by a special icon those exercises that require some form of technology. Exercises that require the full power of a computer algebra system are identified in the text by a CAS icon. Students will utilize this technology in classroom exercises in BR 161 and other lab assignments to be completed outside of class

Spring 2016 MAT161- 003

Calculus with Analytical Geometry I

OS 2004

2:00 PM – 3:05 PM Monday - Thursday

Homework, Tests and Grading:

- **Tests:** 15% each, 60% in total
- **Homework and quizzes:** 10%
- **Final Exam:** 30%

The final grade will be assigned according to:

$90\% \leq A < 92\%$;	$92\% \leq A \leq 100\%$;	
$80\% \leq B < 82\%$;	$82\% \leq B < 87\%$;	$87\% \leq B+ < 90\%$;
$70\% \leq C < 72\%$;	$72\% \leq C < 77\%$;	$77\% \leq C+ < 80\%$;
$60\% \leq D < 67\%$;	$67\% \leq D+ < 70\%$;	F: below 60%.

Test and Final Exam Dates:

Test 1: Wednesday, February 1

Test 2: Monday, February 27

Test 3: Tuesday, March 28

Test 4: Thursday, April 20

FINAL EXAM: Wednesday, May 3, 3:00PM – 6:00 PM

Incompletes: A grade of **I** (incomplete) is given only if approved documented circumstances beyond the student's control (e.g. medical, legal) render the student unable to complete the course work, and only if there is a reasonable possibility of passing the course. The grade **I** is not given simply failing to meet the course requirements.

Note: Productive and effective study skills are important. You probably have heard this before, but mathematics is not a spectator sport. Practice solving math problems regularly and checking your answers/work should also increase the likelihood that you can solve similar problems correctly, quickly, and independently. This can also help you determine the difficulty level you may actually have. It may also help you with delegating how much extra study time you may need and/or if you need to receive assistance outside of class. You may not really know, unless you practice the problems and check your answers. When seeking help, please provide any and all attempted work—this can increase the quality of the help you receive, as well as decrease the time.

Spring 2016 MAT161- 003

Calculus with Analytical Geometry I

OS 2004

2:00 PM – 3:05 PM Monday - Thursday

Attendance: Being on time and regular class attendance are some aspects expected, as well as a respectable presence. Class attendance is one aspect that could help or harm the final grade of a student whose final average is on the borderline between two grades. A student who has **three or less** absences may replace the lowest test grade from the **first three exams by the highest of the five(including final)** An incomplete test is not replaceable. Four or more absences are considered excessive.

Religious Observance Policy: In accordance with North Carolina G.S. 116-11(3a), you are entitled to two excused absences for religious observances per academic year. In order to preserve your right to make up any tests or other work missed for religious observance required by your faith, you must inform the Registrar in writing of your intended absence before the end of the first week of class.

Academic Honor Code and Seahawk Respect Compact: Please refer to Section V in your student handbook and Dean of Students' website (<http://www.uncw.edu/stuaff/doso/>) about Academic Honor Code for the definition and procedures about academic dishonesty offenses. The Seahawk Respect Compact (<http://www.uncw.edu/diversity/src.html>) expresses the core values essential to an open, respectful learning and working environment.

Disability Services: If you have a disability and require accommodations for this course, you need to inform me of this in writing within the first week of class or as soon as possible. If you have not already done so, you must register with the Office of Disability Services in DePaolo Hall (EXT. 2-7555) and obtain a copy of your Accommodation Letter. YOU MUST PROVIDE A COPY TO ME. You should then meet with me, as soon as possible, to make mutually agreeable arrangements based on the recommendations of the Accommodation Letter and resources available. YOU ARE RESPONSIBLE FOR ADHERING TO THE REQUIREMENTS AND PROCEDURES OUTLINED FOR YOU. More information and resources are available at <http://www.uncw.edu/stuaff/disability/>.

The UNCW Statement on Diversity in the University Community: As an institution of higher learning and excellence, the University of North Carolina Wilmington represents a rich diversity of human beings among its faculty, staff, and students and is committed to maintaining a campus environment that values that diversity. Accordingly, the university supports policies, curricula, and co-curricular activities that encourage understanding of and appreciation for all members of its community and will not tolerate any harassment or disrespect for persons because of race, gender, age, color, national origin, ethnicity, creed, religion, disability, sexual orientation, political affiliation, marital status, or relationship to other university constituents.

Zero Tolerance Policy: UNCW practices a zero tolerance policy for violence and harassment of any kind. For emergencies contact UNCW CARE at 962-2273; Campus Police at 962-3184;

Spring 2016 MAT161- 003

Calculus with Analytical Geometry I

OS 2004

2:00 PM – 3:05 PM Monday - Thursday

or Wilmington Police at 911. For University or community resources visit:

<http://www.uncw.edu/safe-relate/campusResources.htm>. Violence prevention information and resources are available at <http://www.uncw.edu/safe%2Drelate/>.

Cell Phones, PDAs, Laptops:

Please silence your cell phone and do not make calls, access applications or text during class. If you have a personal, urgent matter for which you need to be on call, please let me know in advance and/or quietly step outside. In addition, please do not have any PDAs or laptops/netbooks/iPads, etc. open or powered on during lectures.

THE UNIVERSITY LEARNING CENTER

Web address: www.uncw.edu/ulc

DePaolo Hall 1056 & 1003, 1st floor **Tel:** 910.962.7857

The University Learning Center's (ULC) mission is to help students become successful, independent learners. Tutoring at the ULC is NOT remediation: the ULC offers a different type of learning opportunity for those students who want to increase the quality of their education.

ULC services are free to all UNCW students and include the following:

- ❖ Learning Services
- ❖ Math Services
- ❖ Study Skills
- ❖ Writing Services.

The ULC's hours are shorter at the beginning of the semester, during exams, and during the summer, but typically the ULC is open.

Emergency Hotline: (910) 962-3991 or toll free (888) 657-5751
