

CSC 112: Introduction to Programming

Laurie Patterson, Ed.D.

Today's Agenda

- Introduction
- Roll
- What to do if you're not registered
- Review of the syllabus
- Friday...

Office Hours

- Tuesday/Thursday: 1000-1130
- By appointment

On-Line Syllabus

<http://people.uncw.edu/pattersonL/112>

12/3

Course Description

- Prerequisite: MAT 111 or 115.
- An introduction to programming in a high-level language for students who are not computer science majors.
- Algorithms, computer systems, data representation, survey of computer applications, elementary programming techniques, debugging and verification of programs.
- The language to be used is ALICE.
- May be repeated once for credit under a different subtitle.

Required Materials

- *No required textbook.*
- Flash USB drive: 1 GB minimum
- Active UNCW email account.

Special Needs

- If you have a disability and need reasonable accommodation in this course, you should inform the instructor of this fact in writing within the first week of class or as soon as possible. If you have not already done so, you must register with the Office of Disability Services in Westside Hall (ext. 2-3746) and obtain a copy of your Accommodation Letter. You should then meet with your instructor to make mutually agreeable arrangements based on the recommendations of the Accommodation Letter.

Expectations and Responsibilities

- You are expected to take an active role in your learning in this course.
- This includes:
 - regular attendance,
 - paying close attention in class,
 - completing all course requirements on time,
 - being prepared for class,
 - bringing the drive to class

Expectations and Responsibilities

- It is the responsibility of every student to:
 - Uphold and maintain the UNCW Academic Honor Code. For specific information refer to the Student Handbook and Code of Student Life.
 - Check her/his UNCW email account daily for messages from the instructor. Some assignments will be given via email.
 - Periodically access the online syllabus for updates.
 - Each student will complete her/his own work. Any students who copy assignments will receive an automatic 0 (zero) for the assignment and the Dean of Students Office will be notified. If this is a second offense, the Dean of Students will determine what (if any) additional action will be taken.

Expectations and Responsibilities

- It is the responsibility of every student to:
 - Acquire missed materials (due to an absence) from another student and not to disrupt class while trying to “catch up” because of her/his absence.
 - If the instructor requests a student to resubmit an assignment, it is the responsibility of that student to redo the assignment to meet the instructor’s request. The instructor reserves the right to request a resubmission of an assignment for any reason.
 - Submit assignments on or before the due date. Any work submitted after it is due will be viewed as received on the next day and will be penalized as such.

Expectations and Responsibilities

- Students should backup their disks to prevent loss of work completed. Work lost because it was not backed-up by the student will be viewed as work not submitted.

Projects and Assignments

- Specific due dates will be announced in class and later posted on the on-line syllabus in WebCT.
- **DEADLINES FOR SUBMISSION OF ASSIGNMENTS ARE FIRM.**

**NO FOOD OR BEVERAGES ARE ALLOWED
IN THE COMPUTER LAB.**

Exams

- Quizzes:
 - There will be periodic quizzes based on “short subjects”. These quizzes will be used for preparing the exams.
- Exams:
 - There will be two mid-term exams. Each exam will be on information presented in class – both lecture and lab days.
- Finals:
 - Final Exam will be cumulative
- NOTE:
 - Associated with each mid-term will be a practicum where you can show your skills.

Grading and Points

- Miscellaneous Projects
- Projects are due by the date due:
 - Submit via Blackboard Vista. 

Grading and Points

Grading is done strictly by percentages.

93-100	A
90-92	A-
87-89	B+
83-86	B
80-82	B-
77-79	C+
73-76	C
70-72	C-
67-69	D+
63-66	D
60-62	D-
<60	F

How Do I Get an ‘A’?

- Come to every lab.
 - Turn in every lab.
- Come to every lecture.
- Write programs.
 - Turn in assignments on time.
 - Every assignment must be submitted (otherwise ‘F’).
- Make use of office hours, tutors, and fellow students.
 - Send me email early and often.

Attendance

- It is expected that students will attend all classes.
- If a class is missed, it is the student’s responsibility to get notes from a classmate — **NOT FROM THE INSTRUCTOR**. No makeup quizzes or exams will be given without a documented emergency. Some assignments are given in class and due in that class period. Chapter quizzes, while open book and open notes, **MUST** be completed in class and submitted by end-of-class.
- Part of the grade is attendance based...make sure you sign in. If you forget, you can not go back and resign in the next time you come to class.

Attendance

If you do not attend and can not provide evidence about why you were unable to attend, you will not be allowed to makeup an exam.

Attendance!

Syllabus!

See You Friday!
