

Receptive and Expressive Language Disorders

Give three school examples for each communication disorder for your content area. Write them from the student's point of view. If a student had a disorder in one of these areas what would he or she have difficulty doing in school? How could you as a teacher adapt your instruction or management to help accommodate the learners in your classroom?

	Receptive Language Disorder Difficulty understanding the message coming from others (includes listening or reading differences)		Expressive Language Difficulty getting their meaning or message across to others (includes speaking or writing differences)	
	Student	Teacher	Student	Teacher
Verbal (spoken language)				
Non Verbal (space, posture, gestures, facial expressions, paralanguage, movement, touch, eye contact)				
Written (books, articles, handouts, internet)
