| | | |
|---------------|----------|-----------|
| Are | Making | Graph |
| Between | Only | Table |
| Consists | Often | If |
| Continuously | With | Values |
| Corresponding | One | Isolated |
| Curve | Points | Variables |
| Draws | Relation | Known |
| Variation | set | |

If the known relation between the variables consists of a table of corresponding values, the graph consists only of the corresponding set of isolated points. If the variables are known to vary continuously, one often draws a curve to show the “variation.”

Basic College Math (Michaelson, 1945)

Last Serny, Flingledobe and Pribin were in the nerd-link treppering gloopy caples and cleaning burly greps. Suddenly, a ditty strezzle boofed into Flingledobe’s tresk. Pribin glaped and glaped. “Oh, Flingledobe,” he chifed, “that ditty strezzle is tunning in your grep!”
