

Full credit is based on work shown! [Round answers to 2 decimal places.]

7pts

1. In the right triangle shown below, side $b = 6$ feet and angle $A = 25^\circ$. Find sides a and c and angle B .

5pts

2. In the right triangle shown below, side $a = 4$ and $b = 7$. Find angles A and B .

8pts

3. To find the distance from the house at A to the house across the river at B, a surveyor measures the angle BAC to be 35° and then walks off a distance of 110 feet to C and measures the angle ACB to be 50° . What is the distance from A to B? [Note: This is not a right triangle.]
