## ***Education***

### **Ph.D., University of Virginia, Charlottesville, Virginia, 2002**

Degree awarded in Foreign Affairs with concentrations in Comparative Politics/Southeast Asia

Dissertation: *Streams of Least Resistance: the Institutionalization of Political Parties and Democracy in Indonesia*

The dissertation focused on the institutionalization of the party system in Indonesia, the reasons behind observed levels of institutionalization, and the meaning of the level of institutionalization for the consolidation of democracy in the country. Different levels of institutionalization along the different criteria proposed by Scott Mainwaring and Timothy Scully in their book *Building Democratic Institutions: Party Systems in Latin America* for evaluating party system institutionalization have created a uniquely bad outcome in Indonesia. The country's parties are at once strong and weak. And, they are strong in ways that make their weaknesses all the more dangerous. Particularly, party rooting produces a decidedly negative outcome rather than the positive one often highlighted by party system scholars. The rootedness of Indonesia's parties in the country's communal groups challenges stability, the legitimacy of the party system, and the legitimacy of democracy. See the final chapter.
