Drugs and Behavior Review

In general I want you to know the mechanisms of action and the CNS and PNS effects of Caffeine, Alcohol and Depressants. For inhalants you only need to know that nitrous oxide is a depressant.

You need to know how alcohol is metabolized

I want you to know the difference aspects of tolerance for caffeine alcohol and depressants.

I want you to know as much as you can about the public health perspective of alcohol dependence

Know how caffeine and alcohol are derived.

You do not need to know about theophylline or theobromine

Know about the relationship between caffeine and performance

Know about alcohol and barb withdrawal
