1.1 Introduction to the Research

1.1.1 Subsection

This is the introduction to my topic. In Figure 1 is an example of including an eps figure using the epstopdf package.

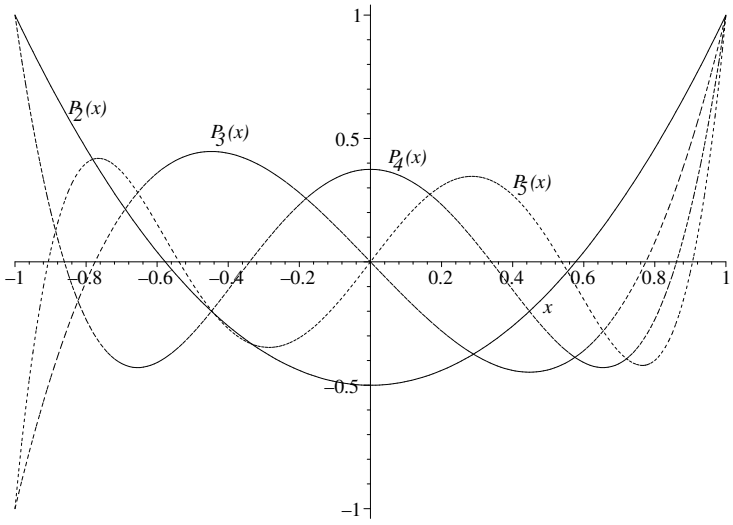

Figure 1: Plot of Legendre polynomials. Need a longer caption to test the list of figures page. No let's see what happens.

For definitions, theorems, and examples, you have environments which set up the proper styles. Here are examples:

Definition 1. A **foobar** is a nonsensical term.

Theorem 1. *If $A = B$ and $B = C$, then $A = C$.*

Proof. This is obvious. □

Example 1. Example of an example.

This is an example.

2 HISTORY

2.1 Introduction to the History

This is a history of my topic. See Figure 3 for an example of using the tikz package to draw figures on the fly.

APPENDIX

A. Sample Program Inclusion

This is a procedure to compute the sum using Maple.

```
SUM := proc(n)
    local i, total;
    total := 0;
    for i from 1 to n do
       total := total+i;
    end do;
    total;
end proc;
