

Drugs and Behavior
Exam 2
Review

The test is 60 multiple choice questions. The chapters covered are 6,7,8 & 9.

Chapter 6 – Major Stimulants

Where did the drugs we covered in this chapter come from?

What are the forms of each?

What is the mechanism of action of cocaine amphetamine, khat, and betel nut?

CNS/PNS actions

Know the pharmacokinetics that we covered in lecture of meth/amph and cocaine.

Know tolerance and dependence issues.

Chapter 7 - Nicotine

Where does nicotine come from?

Mechanism of action

Pharmacokinetics

CNS/PNS actions

Tolerance and dependence

Problems associated with smoking

Changes in smoking prevalence over time

Chapter 8 - Caffeine

What are the natural sources of caffeine and how do they rank in terms of caffeine content

How do Americans consume most of their caffeine?

Mechanism of action

CNS/PNS actions

Tolerance/Dependence

Chapter 9 – Alcohol

Same as above, but really focus on all sections of the chapter. Don't worry about numbers though
